Delivering Innovative Solutions for Better Understanding of Health Using Ai

# Overview

**Struggling to understand your medical reports?**

TahalilAi simplifies them with clear explanations using Stations installed at labs and hospitals or Web/Mobile App or Whatsapp and With our NFC medical CIN stickers, accessing your health information is simpler now. so Lets make healthcare more accessible with TahalilAi

# Problem Statement

## Patients' Ignorance Barrier

Accessing and understanding medical documents may be challenging for individuals who lack medical expertise or resources. This limited accessibility can result in barriers to healthcare decision-making.

## Emergency Info Accessibility

Rapid access to medical data during emergencies, like fainting on the streets, is critical. Integrating NFC stickers on national ID cards with comprehensive medical information could save lives.

## Complexity of Medical Documents

Medical reports and analyses often contain technical language and complex information that can be a bit difficult for individuals to understand. This complexity can lead to confusion and misinterpretation.

## Lack of Collaboration in Healthcare

Effective collaboration between healthcare providers, laboratories, and patients is essential for delivering coordinated care. However, existing communication channels may not support collaboration.

Potential User World Wide

**35%**

Potential User in morocco

- Four in ten people (49.9%) have at least one chronic condition.
- A survey revealed that 35% of Moroccans suffer from chronic diseases.
- One out of ten people worldwide don't possess basic literacy skills.
- Eight in ten people (81.4%) have at least one long-term health condition.
- An astounding 14 billion laboratory tests are ordered annually.
- The average is 6.8 consultations per person per year, with most countries reporting between four and te

# OUR MAIN COMPETITORS.

While Bitaqaty.ma focuses on providing financial protection through social security benefits, Tahalil.ai offers a comprehensive solution for understanding and accessing medical information, targeting a broader audience beyond social security affiliates.

Tahalil.ai's integration of NFC medical card stickers sets it apart from competitors, offering a convenient way for users to access their health information in emergencies, providing an added layer of safety and peace of mind.

Unlike Ta7alil.ma, which primarily focuses on retrieving medical test results, Tahalil.ai goes a step further by simplifying the understanding of medical reports and analyses, empowering users to make informed healthcare decisions.

# Business Model

## Revenue Generation Strategy

Tahalil.ai generates revenue through subscription plans for users and partnerships with healthcare institutions, supplemented by potential government funding. Our services and continuous innovation focus is on delivering value-added industry demands.

## Pricing Structure

Tahalil.ai's pricing structure offers Tahalil Ai Physical Stations at \$800 each and NFC Medical CIN Stickers and Bracelets at \$40 each. The web and mobile applications are available for partnerships, providing customized pricing plans based on the scale and requirements of the healthcare institutions.

## Partnerships

Tahalil.ai collaborates with labs and the Health Ministry to expand accessibility and impact in hospitals to ensure integration into apps, and simplify workflows, while alignment with the NFC stickers. This focus.

## Value Proposition

Tahalil.ai simplifies medical document understanding using AI, providing clear explanations through physical stations, mobile apps, and NFC stickers. This focus.

# Technology & Approach

We use OpenAI's GPT4 model with Google Gemini Pro, the most advanced AI model available, which exceeds the passing score on the Medical Licensing Examination (MLE) by over 20 points. However, our reports are not a substitute for licensed medical diagnosis.

## High Quality Technology

High-quality technology in Tahalil.ai encompasses advanced AI algorithms (GPT4 x Gemini Pro), robotics. This includes tailoring the user interface, integrating infrastructure, and user-friendly interfaces, ensuring accurate analysis of medical documents and seamless user experience.

## Easily Scalable

We grow and adapt to increasing demand or expanding markets. This includes having flexible infrastructure, scalable technology, and streamlined processes that allow for seamless expansion without compromising performance or quality.

## Personalization Approach

Customizing Tahalil.ai's services to meet their specific needs. This includes tailoring the user interface, integrating with existing systems, and providing specialized training and support to ensure seamless integration and enhanced capabilities in delivering healthcare services.

## Sustainable Sustainability

our stations and stickers are environmentally friendly, energy-efficient, and economically viable in the long term. This involves using sustainable materials, energy-saving technologies, and considering the station's life cycle impact to reduce carbon footprint and operational costs.
